EXECUTIVE SUMMARY

Co-founder and CEO at OmniStackIT and certified BSI ISO/IEC 27001 Lead Auditor with an MSc in Information Systems Security. Proven executive and technical leadership in delivering 24/7 Managed Cybersecurity, SOC/MDR operations, GRC advisory, and cloud security solutions across regional markets. Experienced in gap analyses, root-cause incident investigations, audit-ready policy frameworks, and aligning enterprise security with international standards including ISO 27001, NIST CSF, GDPR, and PCI DSS.

CORE COMPETENCIES

Executive Leadership & GRC
24/7 SOC/MDR strategy, ISO/IEC 27001 auditing, enterprise risk assessment, gap analysis, regulatory compliance (GDPR, NIST CSF), policy authoring and security governance.

SecOps & Threat Management
SOC leadership, SIEM/EDR operations, root-cause analysis, vulnerability assessments, incident response, threat mitigation and remediation.

Cloud & Infrastructure Hardening
Azure security, Entra ID (Azure AD), Active Directory, Microsoft 365 compliance, network architecture and secure architecture review.

Technical & Software Security
Python security scripting, PowerShell automation, web application security, relational database security (SQL), GitLab version control and V-Model lifecycle integration.

PROFESSIONAL EXPERIENCE

Co-founder & Chief Executive Officer — OmniStackIT 2023 – Present | Addis Ababa, Ethiopia

- Spearhead executive vision and business operations for a regional cybersecurity firm delivering 24/7 Managed SOC, MDR, and cloud services.
- Lead client engagement for enterprise GRC consultations, ISO/IEC 27001 readiness audits, and regulatory compliance strategy.
- Architect end-to-end security frameworks tailored for enterprise clients across East Africa.

Information Security Consultant / IT Security Specialist — Roseant Engineering PLC Jan 2021 – Present | Addis Ababa, Ethiopia

- Executed comprehensive gap and risk analyses against internal and international standards (including ISO 27001), documenting control effectiveness and improving overall organizational security posture by 30%.
- Performed root-cause investigations on complex system incidents, comparing multi-source telemetry to identify structural anomalies and author actionable mitigation plans.
- Authored and maintained security policies, operational procedures, technical reports, and user guides to ensure full audit-readiness.

Web Application Security Instructor — ITSC Technology Support Apr 2022 | Addis Ababa, Ethiopia

- Instructed advanced web application security modules and evaluated student lab performance, resulting in a 100% certification pass rate.
- Refined cybersecurity training curricula to align with modern web application defense standards.

IT Technician / Programmer — INTAPS PLC Jul 2017 – May 2018 | Addis Ababa, Ethiopia

- Developed and optimized relational database systems for utility billing platforms, improving retrieval times and asset tracking.
- Used GitLab for configuration management and Visual Studio for endpoint software validation.

EDUCATION & CERTIFICATIONS

MSc in Information Systems Security — Sheffield Hallam University, United Kingdom (2018–2020)
BSc in Computer Science — Addis Ababa University, Ethiopia (2013–2017)
Certification: BSI ISO/IEC 27001 Lead Auditor (Information Security Management Systems)
